

The AI Intelligence Layer for your Enterprise

Enterprises generate enormous volumes of data across systems, functions, and processes. Yet most leadership decisions still rely on fragmented reports and delayed insights.

CoreSight brings AI-powered intelligence directly to the C-suite by providing real-time visibility, predictive insight, and unified decision support across every enterprise function.

CORESite transforms live enterprise data into **real-time insight, prediction, and action.**

It connects directly to operational systems, continuously interprets live data, and delivers **trusted intelligence to business leaders exactly when decisions need to be made.**

Not tomorrow. Now.

The CORESite Approach

CORESite moves enterprises from **data access** → to **decision intelligence.**

Instead of static dashboards, CORESite creates a **live intelligence layer** across enterprise systems.

This intelligence layer continuously answers three critical questions:

What is happening right now?

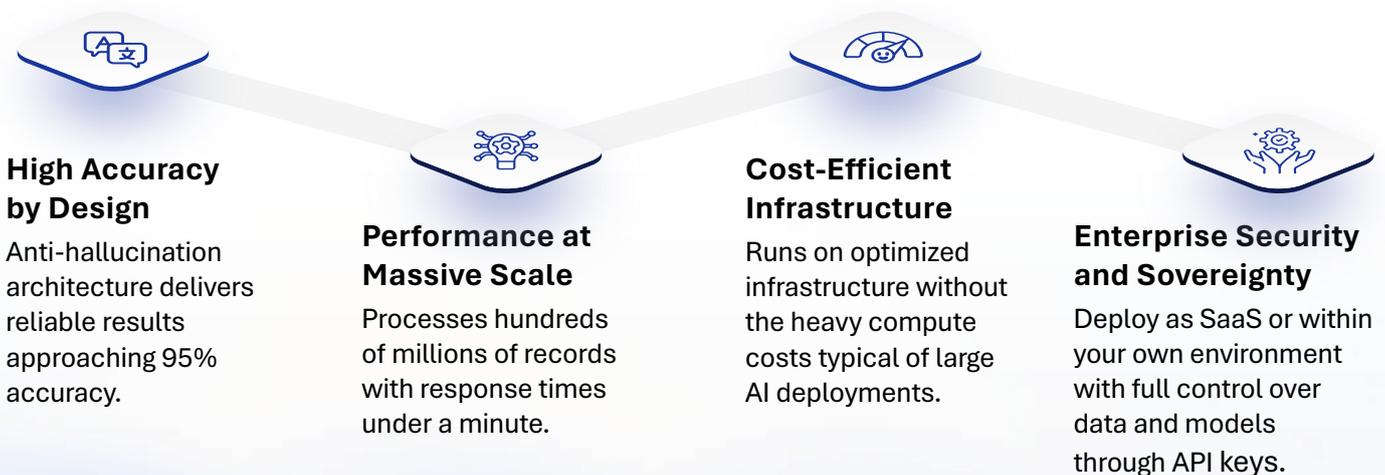

Why is it happening?

What should we do next?

The result: **decisions that once took weeks can now happen in minutes.**

Platform Differentiators

Built for Enterprise Scale, CORESite is engineered for **speed, accuracy, and enterprise trust.**

Core Intelligence Pillars

CORESite combines advanced AI capabilities into a unified enterprise decision platform. The platform not only analyzes current performance but also predicts future outcomes and recommends actions.

Natural Language Intelligence (text and voice)

Multi-Agent Intelligence Orchestration

Live Enterprise Data Integration

Prescriptive and Predictive Intelligence

Explainable and Governed AI

The Big Impact for CXOs

CORESight gives CXOs something most organizations lack: **continuous intelligence across the business.**

Faster response to market and operational changes

The result is a shift from **reactive management to proactive leadership.**

The CORESight Advantage

Unlike traditional BI or analytics platforms, CORESight is designed for **decision velocity.**

It delivers:

Real-time intelligence on live enterprise data

Natural language access to complex insights

Explainable and auditable AI outputs

Enterprise-scale performance

Rapid deployment with minimal IT overhead

Seamless integration with existing systems

CORESight transforms enterprise data from **passive reporting into active intelligence.**

Real-World Transformation in Action

From Data to Decisions for CXO's across industries

Financial Services | Manufacturing | Retail | Automotive | Healthcare

CXO-Specific Value Propositions

CoreSight delivers role-specific intelligence for every functional leader.

CRO

Pipeline visibility and predictable revenue, AI-driven forecast accuracy, higher sales productivity, real-time performance dashboards with zero manual reporting, reduced sales cycle.

CFO

Real-time financial visibility across entities, AI-driven margin and cash flow prediction, scenario planning for faster decisions, cost anomaly detection, close-ready accuracy that simplifies audits.

CSCO

End-to-end supply chain visibility, AI-driven demand forecasting, inventory optimisation across locations, multi-tier supplier risk detection, disruption scenario planning for faster response.

CMO

Unified customer intelligence and segmentation, marketing attribution across channels, real-time campaign ROI visibility, spend optimisation against pipeline contribution, AI-driven demand generation forecasting.

CHRO

Workforce planning aligned to business strategy, attrition prediction and retention insights, talent acquisition pipeline analytics, skills gap identification, DEI progress tracking, workforce cost optimisation.

The Future of Enterprise Operations

In the next decade, the most successful organizations will not simply have more data. They will have **better decision systems**.

CORESight is built for that future.

A future where enterprise leaders can **see what is happening across the business in real time, understand what it means, and act immediately**. From data to decisions. **In minutes**.

About CoreOps.AI

CoreOps.AI is a native enterprise AI platform that modernizes legacy and core systems by unifying data, deploying AI agents to automate operations, and enabling enterprises to achieve outcomes faster and at lower cost.
